How to Reset THERMOLATCH® II Control Mechanism with a New FUSIBLE LINK

1. Leave vent covers open. Remove broken FUSIBLE LINK B and discard. Keep bolt and nut A. (Note: electric Thermolatches have an actuator pin instead of a bolt and nut.)

2. Rotate lever C up.

3. Pull on cable D and place ring E into slot G, rotate lever C down.

4. Attach new FUSIBLE LINK F using bolt and nut A.

Vent covers may be closed and reopened without disturbing new Fusible Link.
