

BILCO Classic Series Basement Door

BILCO Basement doors are supplied in either a red oxide primer or powder coat paint finish. If your door has a powder coat finish, no additional finishing is required.

Painting Instructions

IMPORTANT: Doors supplied with a primer finish must be painted within forty-five (45) days of installation. BILCO requires the use of an exterior alkyd base enamel. For best results, carefully follow the directions on the paint label and apply one thin coat of paint followed by a second coat on both the exterior and interior primed steel surfaces of the door. Two quarts should be sufficient to coat the entire door. Application of paints that are not alkyd based may void product warranty.
